INSECT NOTES FROM COSTA RICA IN 1935

C. H. Ballou
Chief of Entomological Section
National Agricultural School
San Pedro de Montes de Oca

This paper is supplemental to the Insect Notes from Costa Rica in 1934, published as a Supplement to No. 4, Insect Pest Survey Bulletin, Vol. 15, 1935.

The list does not represent the complete collection for the year, but only those notes that give additional data to the previous year.

The same arrangement has been followed as in the previous list. It is not deemed necessary to reissue the map of Costa Rica, as it may be consulted in the original paper. The abbreviations for the localities given in the previous list apply in this one.
